作业1:线性回归

利用所学知识搭建模型,在给定的数据集上训练、验证、测试模型。(注意划分验证集,避免在训练集上过拟合。)

评价指标:

均方误差 MSE。提交 result.csv 后,由助教计算其与测试集标签的 MSE。

数据集:

下载链接: https://pan.baidu.com/s/10MfCuGQS0e0vigzHfUFz4g 提取码: hd65

1. train.csv

The format of each line is as follows:

```
1 # where value0, value1,..., value383 are the features.
2 id, value0, value1,..., value383, reference
```

2. test.csv

This file contains the features whose references you need to predict. The format of each line is as follows:

```
1 id, value0, value1, ..., value383
```

预测结果文件格式:

submission_example.csv

The file you submit should have the same format as this file, the format of each line is as follows:

```
1 id, reference
```

提交:

- 1. 提交方式: <u>2 个文件:源代码(.py 或 .pdf)+预测结果文件 result.csv</u>。打包为压缩文件,以 第一次作业_姓名_学号 格式命名,发送至邮箱 norwa99@163.com 。
- 2. 截止日期: 第 10 周周末 (11 月 5 日 23:59)
